

Wood Lake Nature Center Homeschool Program Evaluation Form 2009

Thanks to you all for participating in another year of homeschool programming! Students and parents, please work together to fill out this evaluation as detailed as possible. Thank you!

The naturalist(s)

- 1) Which naturalist(s) led the majority of your programs?
- 2) What was the naturalist best at?

- 3) What could the naturalist work on to better serve your needs?

- 4) Other comments about your naturalist(s):

The classes

- 1) With a new naturalist coming in next school year to fill the Homeschool Curriculum Coordinator position, what would you like to ensure remains the same with the classes?

- 2) With the new naturalist, what changes would you like to see made to homeschool programs?

- 3) Are there any other class topics that you would like to see added to our 5-year curriculum?

- 4) Additional comments about the classes:

The website:

- 1) How often did you visit Wood Lake's homeschool websites?

- 2) Which website(s) did you use the most? (General homeschool page, homeschool homework page, Friday Group page, monthly class pages)

- 3) Because of the low involvement with homework projects this year, we may not include class time to share homework. Would you still use homework posted on the website if we didn't discuss it in class? (Is it still worthwhile to keep the monthly pages updated?)

- 4) Did you use the 'extras' section? (Papers and charts, websites, and books.)

- 5) Is there anything you would like to see added to or changed about the website?

- 6) Other comments or ideas:

Strictly Students Section

- 1) What did you enjoy most about the classes at Wood Lake?

- 2) What did you like least?

- 3) What could we do to make your time at Wood Lake even better?

- 4) Any other comments or ideas:

Please turn in your evaluation on or before May 16, 2009.
You can either bring this completed evaluation to a class,
mail it to me at Wood Lake Nature Center, or e-mail me the online version.

Thank you! We hope to see you again next fall!
